

Technical Accounting

Sayva provides public and private companies with technical accounting solutions that are a result of a clear understanding of the accounting pronouncements and a team of professionals that have many years' experience working in industry to appreciate a practical approach that is catered to the client's situation.

From startup to large public companies, Sayva will provide you with the guidance and strategy to reach your goals. Combining a deep understanding of accounting standards with a full range of advisory services, our team of technical accounting consultants can help you proactively identify and address issues in an effective and efficient manner.

We can provide technical accounting and financial reporting services including:

- › Audit preparation/readiness
- › Implementation of accounting standards, including ASC 606 and ASC 842
- › In-depth reviews of technical accounting memoranda and conclusions
- › Stock based compensation set-up and analysis
- › Purchase accounting and post-acquisition integration
- › Assessment of current accounting policies and assistance in optimizing policy decisions
- › Spearheading the organization's preparation of Form 10-Q and Form 10-K
- › IPO readiness including S-1 preparation

Sayva services also include:

- › Optimization and enhancement of the processes in the accounting function
- › Business process reengineering of the accounting function
- › Project managing ERP implementations
- › Assisting management with SOX testing and internal controls assessments
- › Data inventory and process mapping
- › Financial modeling, budgeting & strategic planning, and investor deck preparation
